

Gift Card & Loyalty Program

Artwork Requirements and Information

All Custom and A La Carte gift card orders require that artwork is submitted in ready-to-print format per the specifications listed below. Failure in meeting these requirements may result in a poor quality final product, undesirable printing results, or production delay.

Please email all artwork to: art@giftcardtraining.com

File Formats: PDF, JPG, EPS, PSD, AI or TIFF.

Color mode: CMYK.

Black color: Rich Black - 50C 50M 50Y 100K.

Resolution: 300 DPI or higher.

Text Size: 6pt or higher.

Active Text Area: 0.25" inside of trim

Artwork file size (including bleed): 3.625" x 2.375" (1088 pixels x 713 pixels @ 300 dpi)

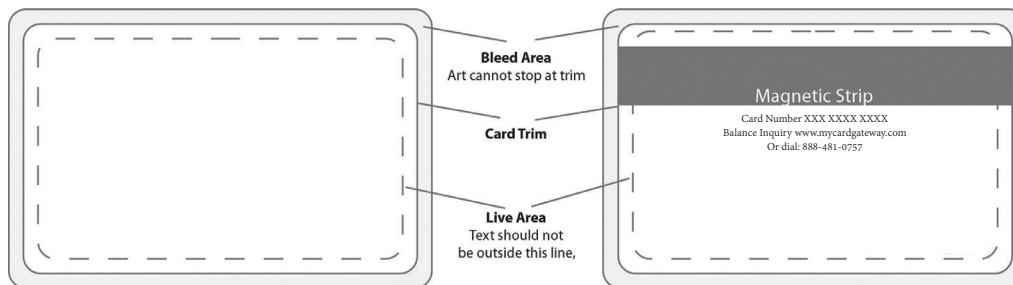

Actual card size: 3.375" x 2.125"

Bleed size: 0.125"

Failure to submit black areas in Rich Black format will cause those areas to print Gray.

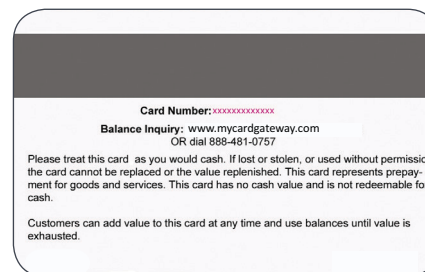

Bleed area required so that art does not get cut off at the edge of the card when printed (as it may cause white edges to appear if bleed is not in place). The actual card size area is shown as Card Trim in the below diagram.

Keep all text 0.25" inside of the Card Trim border (as shown below - the text end line is represented by the Live Area dashes).
